Doonbeg - Putting the Record Straight

It saddens me to hear that rumours abound that Doonbeg is the subject of issues regarding integrity tests. Firstly may I state formally that on no occasion has Porterstown Stud been less than helpful in making Doonbeg available for testing. Secondly this great horse has been tested (as have many other horses) on complete spectrum tests and targeted tests (including EPO and TCO2). On every occasion the result has been negative. The last test at Corbiewood had certification delayed a few days because when the test was taken the gender box was not completed. I hope the matter is now finalised.
