TROTBritain / BHRC proposal

Currently the BHRC are the governing body for the sport of harness racing encompassing both the disciplines of pacing and trotting. They are responsible for licencing, integrity, race entries (trotters and pacers) and race framing (pacers only), production of race cards, results, records, maintaining database. Whereas Trot Britain have responsibility for the handicapping, race framing, the purchase of horses through the LeTrot series and judge of gait of French trotters in TrotBritain/LeTrot trotting races in GB.

Moving forward TrotBritain would like to be autonomous from the BHRC and in doing this believe that they will be more successful in gaining UET membership if they have a model which shows they govern trotting in GB.

Please read the proposal attached then complete the survey:
